

Smoke Alarm Testing

Always follow manufacturer's instructions.

Once a month, test the alarm by pressing the test button, *and*; test the alarm by introducing smoke:

- an adult should carefully light a piece of string or an incense stick;
 - blow out the flame after a few seconds;
 - hold the smouldering string or incense up to the smoke alarm until it activates;
 - fan the chamber to clear the smoke, or press the alarm pause button to silence the alarm.
-
