Sparky's[®] Fire Safety Checklist

By taking the time to do a **fire safety inspection**, and having a grown-up help you correct any problems you discover, you'll reduce your family's risk of being harmed in a home fire.

How to use Sparky's Checklist:

Take about 20 minutes to inspect your home.

Check off your answer to each question and total your points at the end of each section.

When you're done, add up all your points to get your **GRAND TOTAL**.

Sparky has a **Safety Rating** for you and steps to take to improve on those areas that need it.

If you have trouble answering any questions, ask a grown-up to help.
