

Welland Transit

Customer Safety Request

Transit Customers... Public Health Officials are encouraging you to wear some form of facial protection when utilizing public transit. This protection does not have to be a formal medical grade face mask, it can be anything that prevents your respiratory droplets from reaching others when you talk / breathe or landing on surfaces others may touch.

Examples of face protection include;

- T-shirts
- Bandanas
- Towels

For best protection, these non-medical face masks / coverings should:

- be made of at least 2 layers of tightly woven material
- completely and comfortably cover the nose and mouth
- fit securely to the head with ties or ear loops
- be comfortable and not require frequent adjustment
- be changed as soon as possible if damp or dirty

Naturally, staying home is the best prevention and using Welland Transit should be for Essential Trips Only.

Your Cooperation is Greatly Appreciated!
