PUBLIC SERVICE ANNOUNCEMENT

FORKS ROAD BRIDGE RE-OPENS TO THE PUBLIC

The Forks Road Bridge repair has been completed ahead of schedule, and will be open to pedestrian and vehicular traffic as of Thursday, May 12, 2016, at 10:00 a.m. Motorists are reminded that the original load restriction (5 tonnes per axle) remains in effect for the entire length of Forks Road, including the Forks Road Bridge, and that this restriction will be strictly enforced.

The Forks Road Bridge leading to Dain City was closed the afternoon of April 29, 2016 due to structural damage from corrosion. City Council approved immediate maintenance of the bridge on May 3, 2016, which initiated a work-plan and schedule of repairs by Rankin Construction and Black Creek Metal on May 6, 2016. An estimate for completing the repairs was scheduled for May 19, 2016; however, with diligence to completing the project early, the bridge is now suitable and safe for pedestrian and vehicular traffic.
